TrackMaster Plus™

A 100% acrylic, rubberized coating system for running track and other recreational surfaces.

Uses:

- Resurfacing existing SBR latex running tracks
- Use as an athletic track surface on new or existing surface (asphalt or concrete)
- Walking path, jogging trails, middle and high school running tracks
- Coating for rubberized asphalt tracks

TrackMaster Plus is designed for application over properly prepared asphalt, concrete or latex-based running track surfaces. TrackMaster systems contain small rubber granules that enhance the flexibility of the coating and add to the overall shock absorption of the surface. Our synthetic running track formulations beautify and protect against oxidation, raveling, and moisture penetration.

TrackMaster Plus is available in all SportMaster standard colors by utilizing ColorPlus Pigment Dispersion. ColorPlus contains high quality pigments to ensure vibrant color, hiding, and many years of non-fading performance.

Application Methods:

TrackMaster Plus can be applied by soft rubber squeegee or spray. The SandPup II Portable Spray System is recommended for applying TrackMaster Plus by spray.

TrackMaster Plus
Thickness: Approx. 50-55 mils
1 Coat - Acrylic Resurfacer
2 Coats - TrackMaster Plus

Coverage Rate:

Approximately .15 to .20 Gallons per Square Yard per Coat (2 coats minimum)

*For applications on new asphalt, SportMaster Acrylic Resurfacer may be used to fill surface voids. This results in better coverage of TrackMaster Plus and increased feel of cushion on the surface.

Track Repair Products:

Lane One™

A 100% acrylic trowel grade patching material fortified with sand and rubber. Ideal for repairing running lanes, field event runways & pads. Also used for filling cracks up to 1" wide. Lane One is black, but can be coated with TrackMaster Plus to match surface color of the track area.

TrackFlex™ Crack Sealant

Acrylic elastomeric pourable crack sealant designed for sealing cracks up to 1/2" wide in asphalt or latex/rubber track surfaces. TrackFlex is black, but can be coated with TrackMaster Plus to match surface color of the track area.
