Training Ensures Top Performance from Tarconite

Neyra has been in the business of protecting and beautifying parking lots, driveways and playing surfaces for more than three decades. We've learned that even our unparalleled quality control and dedication to continuous improvements just aren't enough to ensure product performance from climate to climate and coast to coast.

That's why training is one of our most important and vigorous endeavors. You can be assured that the professional who applies Tarconite has had the opportunity to attend and participate in one of the most rigorous training schedules in the industry.

Numerous regional and national training seminars are held each business year. Novice and veteran applicators, contractors and distributors all receive the latest in classroom, technical and hands-on training experience. This dedication to performance results in the highest possible return on your investment and the long-lasting beauty of Tarconite.

Application

Tarconite Sealer must be applied to sound pavements. Application requirements and coverage rates vary with age, texture and porosity of the pavement to be sealed.

Tarconite is available through:

NEYRA®

Neyra Industries, Inc.
10700 Evendale Dr.
Cincinnati, OH 45241
1-800-543-7077
www.neyra.com

Tarconite Sealer Meets Government & ASTM Specifications

- Meets and exceeds ASTM Specifications D 5727 and D 490
- Meets Federal Government Specifications R-P-355E (GSA-FSS)
- Meets and exceeds FAA P627 and U.S. Air Force Requirements

For product data, application specifications and MSDS, call 800-543-7077 or visit www.neyra.com

Neyra Industries, Inc. manufactures a full line of asphalt pavement maintenance and recreational surface as well as application equipment sold and distributed nationally at our plants and through distributors and contractors.

Guard Your Investment

Tarconite meets and exceeds rigorous FAA requirements for airport pavements.

Tarconite protects for pennies a square foot, preventing costly repairs.

Tarconite provides up to 50% greater wear than non-fortified sealers, making it ideal for high-traffic areas.

Tarconite preserves asphalt pavement with a deep, rich, black seal that beautifies and protects.

BEAUTIFY

Restore that "black-as-night" original look.

PREVENT OXIDATION

Block out the damaging effects of the sun and ultraviolet rays.

SPILL DAMAGE

Keep gasoline, oil, jet fuel leaks and spills from penetrating the surface.

WEATHERPROOF

Protect against the number one pavement-destroying force - water.

MAINTENANCE

Shield pavement against the elements that cause cracks and potholes.

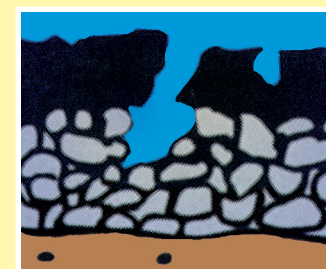

PRESERVE YOUR INVESTMENT

Make your property safer, cleaner, more attractive and longer-lasting.

For more than 30 years, thousands of businesses and individuals have made Tarconite Sealer their first line of defense to protect the longevity and beauty of millions of acres of asphalt pavement. Locking out spills and protecting against the elements, Tarconite delivers a rich, smooth, black finish that's unparalleled in the marketplace, year after year. When appearance and protection are foremost in your mind, invest in Tarconite.

Why Asphalt Pavements Deteriorate

Unprotected pavement is damaged by environmental effects:

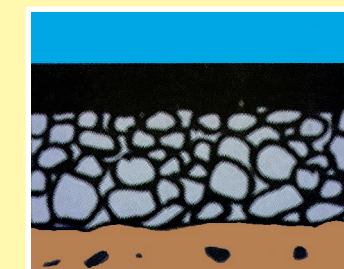

Unprotected Pavement

- Sunlight, moisture and gasoline leave surface gray, open and porous.
- Moisture is allowed to penetrate. Hydraulic pressure and freeze-thaw increases the size of the cracks.
- Aggregate washes away and cracks grow larger.
- Pavement begins to fail.

How Tarconite Sealer Protects

Tarconite extends the life of your pavement:

Tarconite Protected Pavement

- Shields against the drying action of the sun and ultraviolet rays.
- Prevents water penetration.
- Resists damage caused by gasoline and oil.
- Bonds firmly to the surface to provide an even-textured, durable barrier.
- Restores that rich, black look of new pavement.
